

## Faculty

**Carol Huegel, PT, HPCS-** Carol is a PT graduate from the university of Florida. She has an NDT and vestibular rehab background and has incorporated hippotherapy in treatment with patients of all ages from toddlers to 80's with varied diagnoses. Carol attended her first PATH, Intl Workshop in 1982. She co-founded two not for profit organizations, most recently GREAT! - Gainesville Riding through Equine Assisted Activities and Therapy. Carol has served as a clinical instructor for physical therapy and assisted students from a variety of programs around the country. She is a PATH, Intl Registered Therapist and Riding Instructor and a Hippotherapy Clinical Specialist. She is a past AHA Board Member and is the current Chair of the American Hippotherapy Certification Board.

**Meredith Bazaar MS, CCC-SLP, HPCS-** Meredith S. Bazaar is a NJ and NY state licensed speech-language pathologist and lifetime equestrienne. She is a Past President of the American Hippotherapy Association, Inc. Meredith is the founder of MSB Therapy, which provides speech and language treatment and evaluation using the strategy of hippotherapy and equine movement at Starlight Farm as well as in her office in Ringwood, New Jersey. She has been a speech-language pathologist at Montefiore Medical Center, as well as in a sub-acute care center and a private ear, nose, and throat practice. She has provided Early Intervention services and consulted for boards of education. Meredith also managed a day program for individuals with traumatic brain injury and provided residential care for United Cerebral Palsy of New York State

## Course Location

Naples Therapeutic Riding  
Center  
206 Ridge Drive  
Naples, Florida 34108

## Travel Information

**From I75:** Take exit 111. Head west on Immokalee Rd. Turn left on Livingston Rd. Turn right onto Vanderbilt Beach Rd. Turn left on Goodlette-Frank Rd. Turn right on Center St. Arrive at NTRC.

## Lodging Information

Best Western Naples Inn & Suites- 2329 9th Street North Naples, FL 34103 (239)261-1148  
Fax:(239)262-4684

## Course Description

**Course prerequisite:** Successful completion of the on-line “Intro to Equine Skills” test reviewing equine care and management. Completion of the course prerequisite must be done at least 3 weeks prior to the start of the Level I course. AHA, Inc. staff will confirm with that the test has been completed and passed. The cost of the test is \$35.00. Visit the AHA, Inc. website under “Curriculum Overview,” to locate the link to purchase the on-line “Intro to Equine Skills” test.

**Course Overview:** This course is an overview of the principles of hippotherapy, designed for therapists (PT, OT, SLP, PTA, COTA, SLPA) interested in utilizing hippotherapy in their practice. The course is equivalent to 4 days total instruction: 1 day of on-line study prior to 3 days of in person instruction. The on-line study consists of foundational information required for an understanding of the principles of hippotherapy. In person, the first day emphasizes the horse, and the importance of the quality of the horse’s movement working in treatment.

A few of the course Learning Outcomes include: (for a full list of Learning Outcomes please visit the AHA, Inc. website).

- Learners will be able to describe the five primary relationships between the three-dimensional movement of the horse's pelvis and the human pelvis for application during a therapy treatment.
- Learners will be able to describe how the three-dimensional movement of the horse can be incorporated to facilitate the neuromotor systems that support functional motor and communication

outcomes.

- Learners will be able to list and describe five key considerations in patient evaluation for determining if hippotherapy, skilled equine movement, should be included in a patient’s therapy POC.
- Learners will be able to list and describe six precautions and/or contraindications for inclusion of hippotherapy, skilled equine movement into a patient’s therapy POC.
- Learners will be able to list and describe the five primary parameters with respect to matching patient impairment, size and functional limitation and horse size, gait and temperament for optimal and safe incorporation of skilled equine movement into a therapy POC.
- Learners will be able to demonstrate three safe methods of transitioning the patient on/off the horse during a therapy treatment session.
- Learners will be able to identify and describe four biomechanical and two sensory effects of skilled equine movement on an individual during the mounted practicum relating those effects to functional outcomes in therapy.
- Learners will demonstrate the correct fit and describe the effects for a variety of equipment for the horse and patient when including skilled equine movement in a patient's therapy POC.
- Learners will be able to list three potential emergencies and describe appropriate safety procedures related to those emergencies when hippotherapy (skilled equine movement) is incorporated into the therapy.
- Learners will be able to describe the effect of skilled equine movement on three different patient diagnoses as related to

their systems impairment, participation restriction and functional outcomes through participation in a therapy treatment planning practicum.

- Learners will be able to explain how to purposefully manipulate equine movement by describing five different strategies that can be incorporated into treatment to rehabilitate the impairment in the patient's system and work on goals set in the therapy POC.
- Learners will demonstrate correct documentation in writing treatment and progress notes related to the current use of equine movement as a treatment tool/strategy incorporated into occupational therapy practice.
- Learners will be able to list three examples of how the therapist using skilled equine movement incorporates the AHA Best Practice Guidelines into the practice of occupational therapy.
