Course Description

This curriculum is the follow up to AHA, Inc. Treatment Principles– Level I, with an emphasis on patient treatment and more advanced equine knowledge necessary for hippotherapy as an equine discipline.

Lecture, discussion, collaborative work and actual patient treatment occur over 4 days. Subjects include: recognizing desirable conformation, soundness, and movement qualities of the therapy horse; training, conditioning and monitoring of the therapy horse; understanding optimization of the therapy horse for a patient treatment; and safety principles for the therapy horse and environment. The therapist will learn to identify and convey to the horse handler the necessary skills required to produce quality movement when leading, lunging or long lining the hippotherapy horse in patient treatment and understand the need to educate and train staff and/or volunteers who will be working with the therapy horse. Understanding the requirements to maintain a safe, effective and successful clinic program including billing, documentation and clinical evidence for the inclusion of hippotherapy in the treatment plan. This curriculum is designed to provide and facilitate a problem solving treatment approach, using actual patients currently involved in hippotherapy as part of their physical, occupational or speech therapy treatment plan. Practical applications of the AHA Conceptual Framework, including Dynamic Systems and Motor Learning Principles will be facilitated.

Treatments will be videotaped and reviewed with discussion and instructor feedback to analyze and further advance the learning experience. This course may be attended by

licensed Speech, Physical and Occupational therapists and assistants (PTA, COTA, and SLPA's).

The curriculum may be utilized only under conditions set forth by AHA, Inc.

A few of the course Learning Outcomes include: (for a full list of Learning Outcomes please visit the AHA, Inc. website.

- Therapists will demonstrate understanding of the Hippotherapy Conceptual Framework (HCF) in clinical problem solving by identifying 5 HCF tenets when implementing skilled equine movement into a patient's therapy POC.
- Therapists will apply the hippotherapy conceptual framework in the adult and pediatric populations with neurological impairments in various case scenarios and link it to therapy treatment progression and note writing.
- Therapists will develop and implement a therapy treatment protocol for skilled equine movement, that incorporates horse selection, equipment, and handling; equine movement progression, and integration of hippotherapy to create an adaptive response in the patient's system to address participation restrictions and functional skills in two comprehensive therapy treatment practicums.
- Therapists will demonstrate effective use of equine movement in two comprehensive therapy treatment sessions to enhance treatment outcomes.
- Therapists will demonstrate the use of

appropriate pre- and post-treatment functional outcome measures for therapy patients in two comprehensive treatment practicums.

- Therapists will be able to describe 2 treatment criteria for identifying when hippotherapy, skilled equine movement might no longer be an effective treatment tool/strategy for inclusion in a patient's POC.
- Therapists will be able to describe 3 procedures for due diligence of HIPAA compliance in verbal and written communication among team members when hippotherapy, skilled equine movement is included in a patient's POC.
- Therapists will list and describe 5 ways that the AHA, Inc. Best Practice Guidelines can be demonstrated in the use of hippotherapy, skilled equine movement in clinical practice.
